# Chapter 1

## TC - Text Compiler

This is just a glorified grouping of aliases I want to use with some combination of Latex, Markdown, and Pandoc.

### Supported Output Types

- [WIP] PDF
- [TODO] HTML
- [TODO] PPTX
- [TODO] DOCX

### PDF “Options”

Pandoc is leveraged to build the input (presumably a markdown or Latex file) to pdf.

### Bibtex Support

### CSL Style Sheet support

### Formatting - Table of Contents

### Formatting - Margins

### Formatting - Black URL/Reference links

### TL;DR

I’m lazy; this builds things from text...
